Today, besides us being back from our practical stage, we got some exiting news for you! As our website grew bigger and bigger with an average visitor count of almost 10 per day, we got an amazing offer from our friends at Amazon.

Jeff Bezos anouncing the breaking news at a dedicated Keynote

Jeff Bezos contacted us personally a few weeks ago and offered to buy the Betterzon project for nearly **$43B**! He specifically pointed out that the UI we designed was market-leading, giving our customers the best possible user experience. We are flabbergasted to hear this by the former CEO of one of the world's biggest companies and can't be thankful enough for this unique opportunity.

We think that this is a huge possibility for us to grow and make Betterzon even better. Teaming up with one of the leading e-commerce companies gives us all the options to scale our project to meet the huge amount of daily visits we currently face.
